

WINDOWS VISTA – Software Settings.

This tutorial will show you how to ensure your DVD Backup software will run properly on the Windows Vista operating system.

Install the software and then follow the directions below and then your software will be ready to use for backing-up your DVD movies.

WINDOWS VISTA - Changing Compatibility Mode:

(this fix will work for virtually any program you might have problems running under Windows Vista)

1. Right-click on the program's shortcut on the desktop
2. Choose **Properties** then click on the **Compatibility Tab**
3. Under **Compatibility Mode**, check "Run this program in compatibility mode for:" use the drop down to select "**Window XP (Service Pack 2)**".
4. You may also want to change the privilege Level. On this same tab at the bottom check "**Run this program as an Administrator**" then click Apply, and OK.
